Story 1

Country

France

Germany

Of the remaining two countries, France is selected, as it has roughly 5.5 times as many incoming tourists as Germany, indicating a substantially larger and more lucrative market for rail travel. This significant difference in tourist numbers suggests greater potential for customer base expansion and revenue generation in the France market.

<	Passenger Volume & Railway Lines	Ease of Doing Business & Economic Strenght	Geographic Proximity	Incoming International Tourism	Conclusion	>
---	----------------------------------	--	----------------------	--------------------------------	------------	---

After a thorough analysis, France emerges as the top pick. It stands out in passenger volume and extensive rail lines, striking a perfect balance with its robust economy and business-friendly environment. Its geographic location offers potential for international expansion, notably with promising neighboring countries. Moreover, France’s exceptional tourist appeal, leading in visitor inflow, presents a lucrative market for rail travel. These combined factors make France the most promising country for establishing the new rail travel company.
